Infor CloudSuite Industrial (SyteLine): An Experienced ERP System with Functionality Built for the Oil & Gas Industry

Could your company use one of the leading mid-market ERP systems AND the specific functionality required by oil and gas equipment manufacturers and service providers?

For years mid-sized manufacturers have had to choose between a robust, experienced ERP system and a system with the industry-specific functionality that they needed. Infor CloudSuite Industrial ERP has a new answer to this problem. CloudSuite Industrial, used by over 5,000 companies worldwide, contains specializations specifically designed for the oil and gas industry. In addition, Decision Resources has decades of experience implementing manufacturing systems for this industry.

1. **Full-Featured Quality System**
   SyteLine's Quality System is a complete quality system consisting of three modules; customer, vendor, and in-process. The system will allow you to track everything from customer complaints and corrective actions to vendor performance and inspections statistics.

2. **Sophisticated Project Management**
   CloudSuite Industrial's project management system handles multi-tiered projects and tasks. CloudSuite Industrial's built-in project features are ideal for handling everything from tracking receipt of customer specs to managing internal R&D projects.

3. **Shop Floor Automation**
   CloudSuite Industrial's Factory Track application can quickly automate shop floor transactions of all types – while giving you the flexibility to track only the information that you need.

4. **Service and Repair**
   CloudSuite Industrial's service application provides users with the ability to track field service orders and staff, manage depot repairs, and schedule in-house maintenance as well. Mobile applications allow technicians to manage tasks from the road.

Infor CloudSuite Industrial (SyteLine) has been helping manufacturers move forward since the 1980's, so the functionality listed above is only part of the rich set of features in the system. CloudSuite Industrial addresses everything from CRM and Estimating to Advanced Planning and Financial Management. Combined with a Microsoft platform that provides a powerful workflow engine, seamless integration to office applications, and online and mobile tools – we make sure users have the data they need, when they need it.

MOVING MANUFACTURERS FORWARD.
