Infor CloudSuite Industrial (SyteLine): An Experienced ERP System with Functionality Built for Foundries and Forging Companies

Could your company use one of the leading mid-market ERP systems AND the specific functionality required by the primary metals industry?

For years mid-sized manufacturers have had to choose between a robust, experienced ERP system and a system with the industry-specific functionality that they needed. Infor CloudSuite Industrial (SyteLine) ERP has a new answer to this problem. SyteLine, used by over 5,000 companies worldwide, now contains specializations specifically designed for foundries and forging companies. In addition, Decision Resources has decades of experience implementing manufacturing systems for this industry.

1. Sophisticated Planning and Scheduling

- Capable of handling multiple items going through heat treat or other operations together.
- Visibility into raw material usage and flexibility to add and modify virgin material vs. scrap material during the production process.

2. Product Attributes

Capture chemical properties and other attributes by product and lot.

3. Shop Floor Automation

CloudSuite Industrial's Barcode application can quickly automate shop floor transactions of all types – while giving you the flexibility to track only the information that you need.

4. Full-Featured Quality System

CloudSuite Industrial's Quality System is a complete quality system consisting of three modules; customer, vendor, and in-process. The system will allow you to track everything from customer complaints and corrective actions to non-conformance statistics.

5. Customer and Vendor Web Portals

Powerful, configurable portals allow your customers and vendors to get the information they need when they need it.

Infor CloudSuite Industrial (SyteLine) has been helping manufacturers move forward since the 1980's, so the functionality listed above is only part of the rich set of features in the system. CloudSuite Industrial addresses everything from CRM and Estimating to Advanced Planning and Financial Management. Combined with a Microsoft platform that provides a powerful workflow engine, seamless integration to office applications, and online and mobile tools – we make sure users have the data they need, when they need it.

MOVING MANUFACTURERS FORWARD.
