

One-Step, One-Click Shipping!

SureShip provides a single-point of interface for connecting Infor CloudSuite™ Industrial (SyteLine) shipments with UPS, FedEx and USPS Select LTL carriers. Written in CloudSuite's native Mongoose™ architecture, SureShip provides complete real-time data integration between SyteLine and your shipping carriers.

Supports:
Customer Orders
Pick, Pack & Ship
Transfer Orders
Service Orders

- * Direct API integration between SyteLine and shipping carriers
- * Efficient and streamlined user interface for shipping
- * Select LTL integration
- * Rate shopping
- * Freight billing and charge-backs
- * Instant package tracking
- * Written 100% in Infor's Mongoose platform
- * Deployed on-premise or in the cloud

SureShip fully integrates with ERP technologies, so you don't have to leave your ERP application to perform shipping transactions. This saves thousands of hours each year and eliminate the hassle of using multiple, disparate solutions.

"Having SureShip plugged directly into our ERP application frees up at least one full-time equivalent in our warehouse staff, leaving that time to work on things that really add value to the company. Not only can we rate-shop the best method prior to shipping, but instant visibility of our shipping costs and charges mean we're on top of things from the start."

Thomas Morton
Vice President and CFO - SV America Holdings
(manufacturer of aerospace and
high-performance auto racing parts and accessories)
