COMMERCE SIMPLIFIED

At Decision Resources, we are passionate about helping businesses make informed decisions that fuel growth. For over 40 years, we have partnered with leading manufacturers to modernize their business operations with the latest advancements in technology and ERP software.

As a team, we are constantly developing new tools to convert mundane, manual, and/or error prone processes to more efficient, automated, and productive business processes.

Decision365 was built on Microsoft 365 technology and is a suite of commerce tools comprised of 4 modules:

- **EDI**
- **OCR**
- **eCommerce**
- **Customer Self Pay**

These modules can be purchased and implemented as standalone products or as a suite.

Decision365

COMMERCE SIMPLIFIED

Why Decision365? Decision365 solves critical business gaps while accelerating companywide productivity, speed, efficiency, and automation. Our Infor certified development team works within the Infor framework to build secure, scalable tools that work seamlessly with Infor CloudSuite Industrial (SyteLine) ERP. With Decision365, you'll see improvements in:

**Sales Order
Automation**

**EDI &
eCommerce**

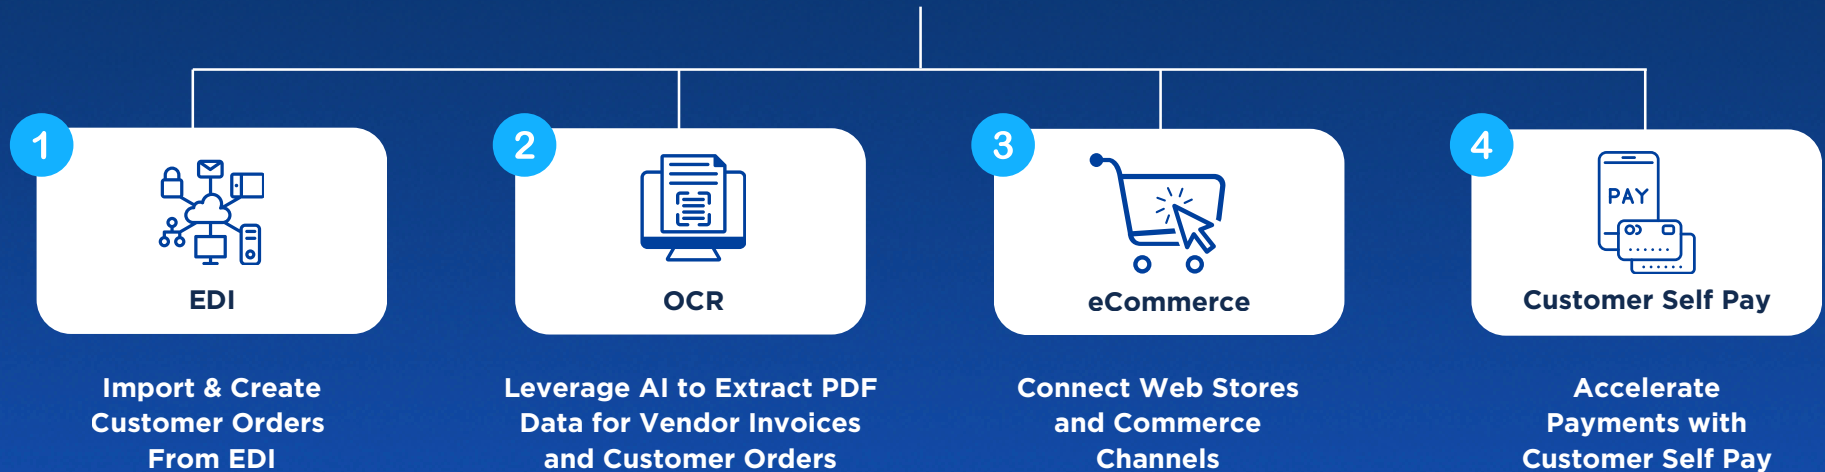

**Invoicing &
Payments**

Decision 365

COMMERCE SIMPLIFIED

Your complete suite of commerce tools built on Microsoft 365 technology for
Infor CloudSuite Industrial ERP.

Custom product configurations and packages available.
Now available in on-premise or cloud deployments.

Decision365 EDI Module is a integration and connectivity tool that supports seamless Electronic Data Interchange across multiple channels and output. Our tool takes the data you receive from multiple sources and formats, standardizes that data, and displays all your orders in a uniform, organized, and digestible layout within Outlook.

Once reviewed and approved, this data flows seamlessly into Infor CloudSuite Industrial (SyteLine) ERP to ensure efficient and automated sales order management processes, decreasing time spent managing exceptions, increasing data accuracy, and improving overall productivity.

The entire suite of Decision365 modules was built on Microsoft 365 technology to support the platforms your team already use every day like Microsoft Outlook and Infor CloudSuite.

Decision365 EDI seamlessly connects to over a dozen leading EDI outputs, leading retailers, and trading partners, like:

SPS COMMERCE

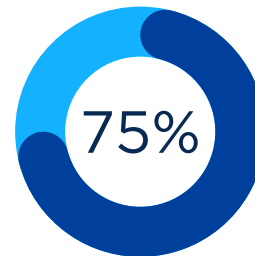

Our preferred and trusted EDI Partner, SPS Commerce, has successfully integrated our solution for hundreds of Infor CloudSuite Industrial customers.

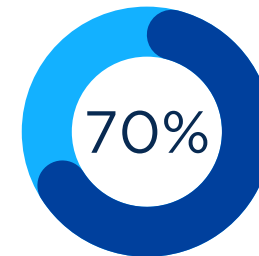

Decision365 Optical Character Recognition (OCR) Module helps support advanced sales and order processing automation for Infor CloudSuite Industrial (SyteLine) ERP. Using the latest technology advancements, we are able to achieve a 2% higher accuracy in data translations compared to other OCR scanners using advanced vision-language models (VLMs).

Decision365 OCR is US based, and leverages Google Vision AI technology for an accurate scan and conversion of PDFs, and images both validating and writing directly to Infor CloudSuite Industrial (SyteLine) via API for:

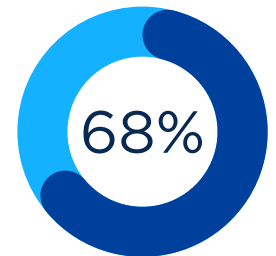

- **Vendor Invoices to Accounts Payable Vouchers**
 - 3-way matching against Qty and Price
 - Non-PO approval layer
- **Purchase Orders to Sales Orders**

Average time savings by implementing OCR vs. manual data input.

Of businesses report an error rate of over 1% from manual invoice and payment processes.

Businesses rely on manual entry for sales order entry.

Decision365 OCR for Accounts Payable (creating Voucher)

With OCR AP, you'll gain automated features, like:

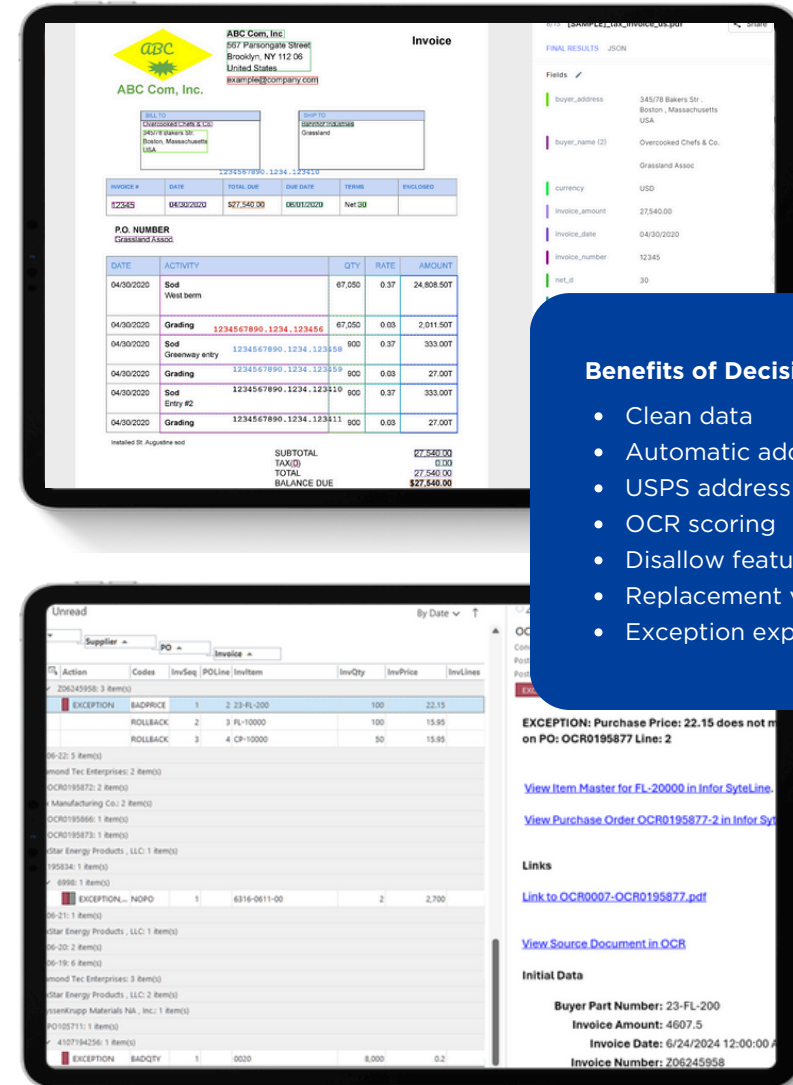

- Vendor invoice matching on PO, price, and quantity
- Routing of non-PO invoices for approval
- AP voucher creation from matched or approved vendor invoices
- Attachment of PDF invoices, to Voucher notes.
- Lines that don't match generate exceptions. Easily manage, review, and push data to your ERP

Decision365 OCR for Sales

With OCR for sales, you'll gain automated features, like:

- Direct Customer Order creation via the IDO API
- Updates of UET (user fields) and updates of any order properties.
- Validations on Price and tolerance, Unit of Measure, Dates including future CTP dates from APS.
- Fuzzy address match looking for close matches that exist in ERP.
- USA addresses are USPS validated
- Lines that don't match generate exceptions. Easily manage, review, and push data to your ERP
- Multiple Actions exist to add and manipulate data without typing.

We import, process, and validate data directly using CloudSuite Industrial using direct IDO APIs. Both OCR AP & Sales are offered in shared tenant configurations or as standalone customer (you) dedicated. In the shared model, the pdf fields and mapping to ERP are pre-defined to support all customers in that module.

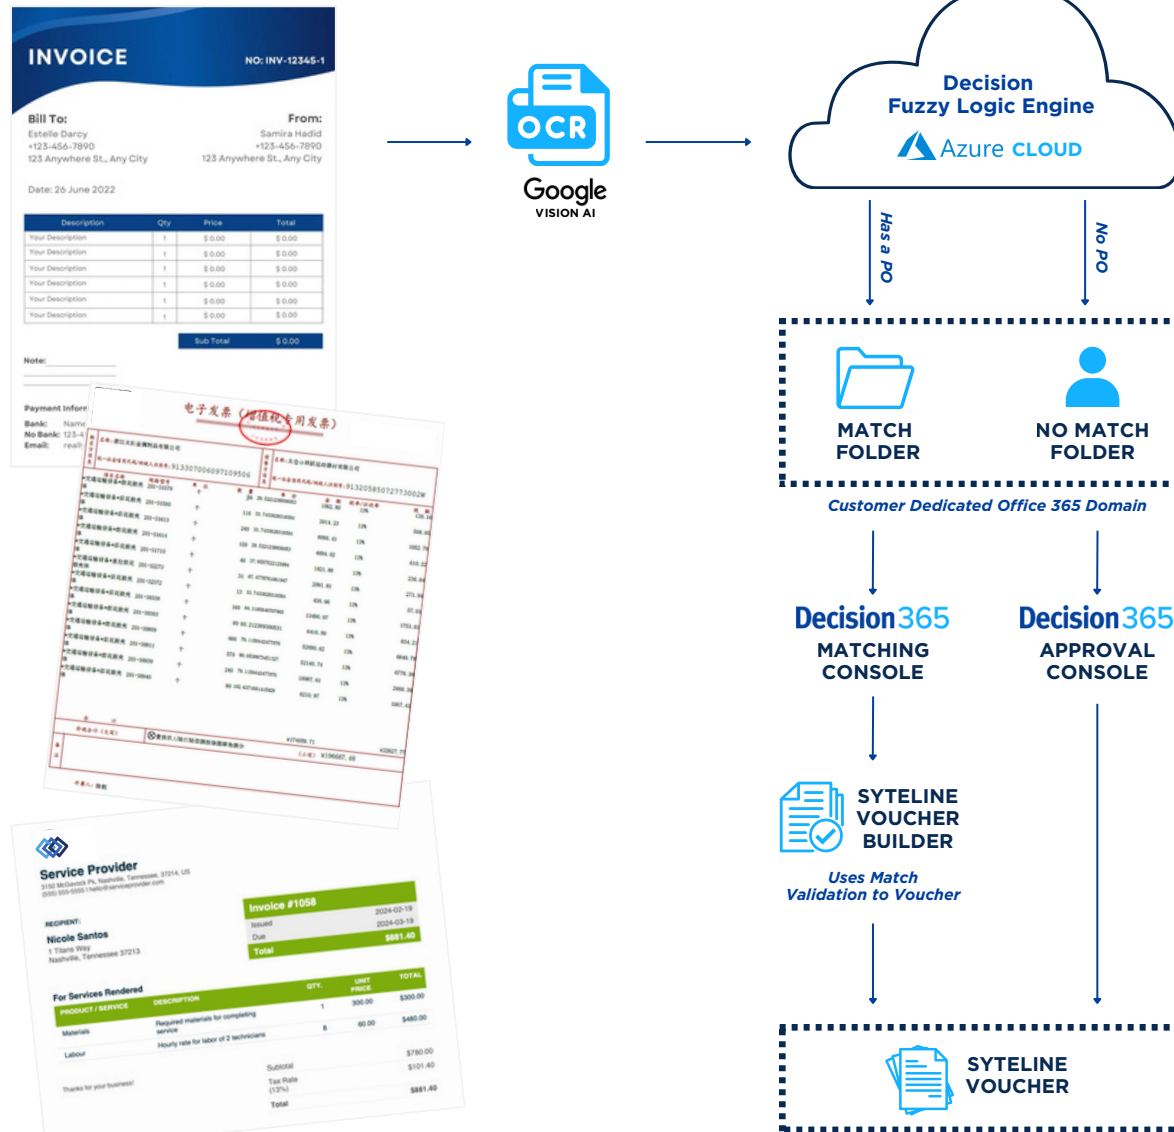

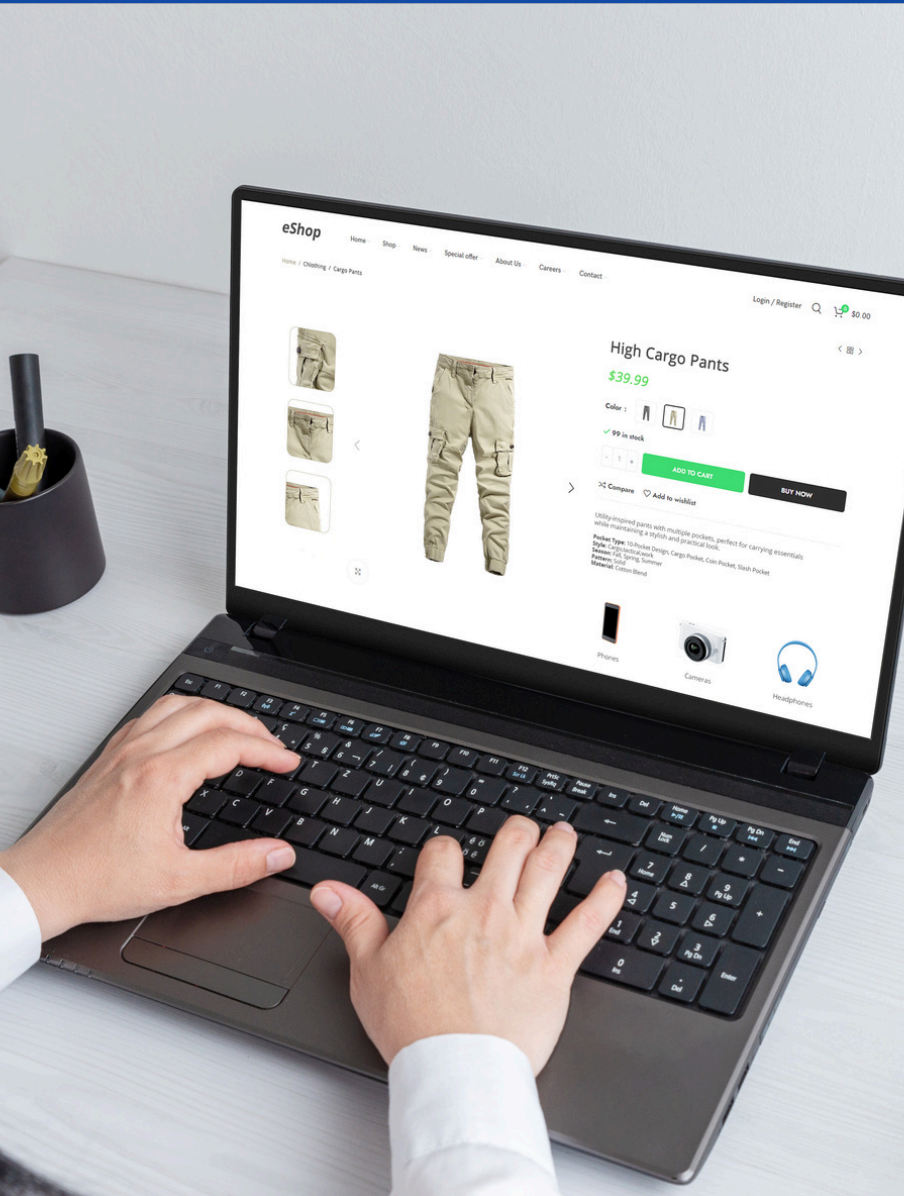

Benefits of Decision365 OCR

- Clean data
- Automatic address parsing
- USPS address validation
- OCR scoring
- Disallow feature
- Replacement values/rules
- Exception explanation

OCR

Decision365 eCommerce Module is a multi-channel SyteLine, eCommerce interface honed on Shopify, it also is can be leveraged for Big Commerce, Woo Commerce as well as other Web Stores.

Beside bringing your orders automatically into CloudSuite, Shipment Tracking information is sent back and ultimately to your customers. Warehouse data is sync'd anytime inventory changes. For those that do not like entering credit card payment information, A/R Payments can automatically be created and posed off of credit card purchases.

With our quick and easy setup, your organization can be up and running in less than a week, observing business benefits, like:

Eliminate Manual Order Entry

Integration of Multiple Warehouses

Improve Shipping and Order Tracking

Synchronized Real-time Inventory

Integration of Multiple Sites & Stores

Provide CTP/ATP IDates to Customers

Technical Features

Shopify Metafields

UET-equivalent data from Shopify can update SyteLine UETs. SyteLine Customer Order references are stored in Shopify Metafields by default.

iPaaS Solution

Hosted on Azure with full turnkey services reaches into your SyteLine system via IDO APIs.

Microsoft Exchange

Utilizes #1 message queue (not email). All items flow through Microsoft Exchange to SyteLine.

Office365 Platform

Display order lines in a uniform view within Outlook with Visual Cues to highlight price, or other issues.

Flexible Deployment

Compatible with both on-premise and cloud ERP deployments, and Many to Many Stores or SyteLine site.

ERP Compatibility

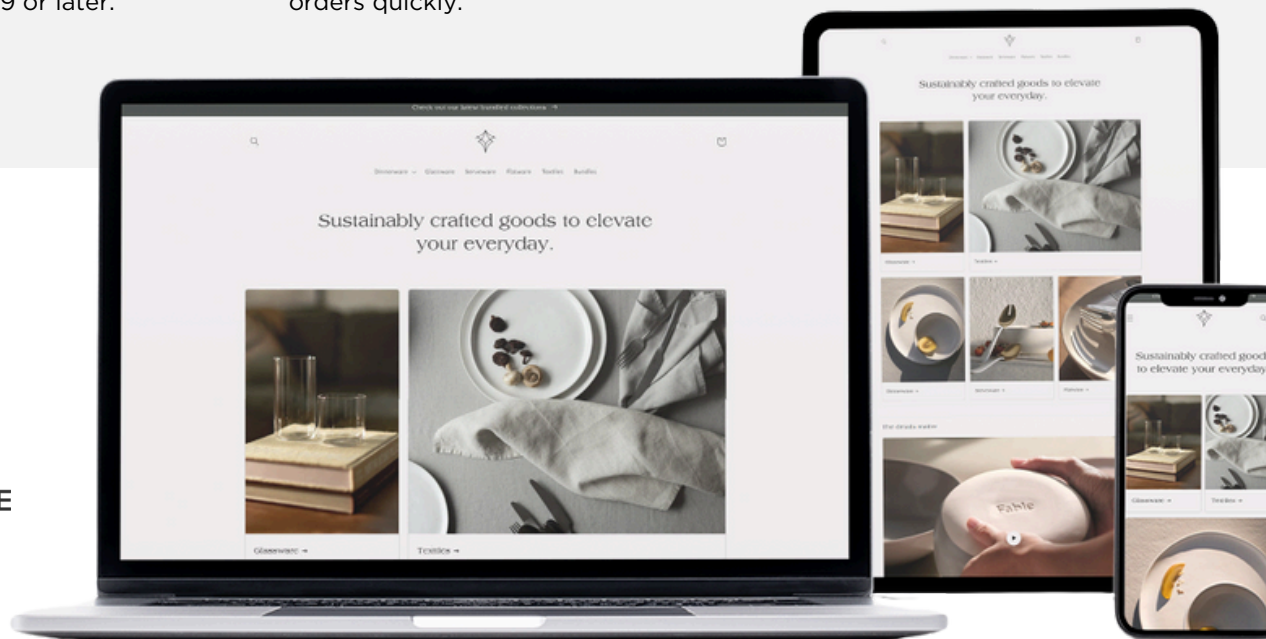

Infor CloudSuite Industrial (SyteLine) versions 9 or later.

Rapid Deployment

Installation is quick. Accept new orders quickly.

eCommerce Cmpatibility

Configurations available to connect with leading eCommerce platforms, like:

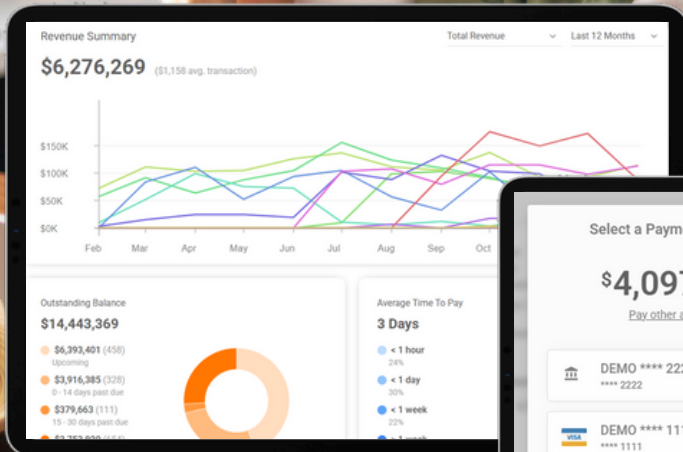

Decision365 Customer Self Pay Module is powered by ZonnalPay and built to increase invoicing and payment efficiency by digitalizing the payment process for your customers. This module can be purchased as part of the Decision365 commerce suite or standalone.

With this self-pay solution, you'll see improvements and benefits, like:

- Reduction in invoice processing times
- Electronic Check or ACH payments
- Credit Card Payments
- Reduced manual errors and administrative work
- Increased customer satisfaction and ease-of-use
- Increased payment security and compliance as your employees do not handle credit card numbers
- Intelligence and reporting dashboards
